INTRODUCTION

I am a second-year Computer Engineering student with a strong passion for technology and innovation. As a dedicated tech enthusiast, I am constantly exploring emerging trends, building projects, and sharpening my problem solving skills to prepare for a dynamic career in the tech industry.

PROJECTS

2D Game Development View Project

Unity Engine (With C#)

- Developed a 2D gameplay experience using Unity, focusing on smooth player controls and interactions.
- Implemented Unity's built-in physics engine to simulate realistic movement and collision behaviors.
- Designed basic game maps and scripted core mechanics using C# for dynamic gameplay functionality

3D Game Development View Project

Roblox Studio (With Lua)

- Built a 3D gameplay experience in Roblox Studio, delivering immersive and interactive environments.
- Integrated database storage to manage player data and game state persistently across sessions.
- Developed real-time online multiplayer features using Lua, enabling smooth player-to-player interactions.

Frontend Web Development View Project

Html | CSS | Javascript | React

- Designed and developed responsive user interfaces using HTML, CSS, and React for a dynamic web application.
- Currently planning API integration and database connectivity as part of future backend development.
